PURE WATER OCEANSIDE BREAKS GROUND

The **City of Oceanside** broke ground on **Pure Water Oceanside**, a project that will purify recycled water to create a new local source of high-quality drinking water that is clean, safe, drought-proof, and environmentally sound. Scheduled to be completed before the end of 2021, Pure Water Oceanside will be the first operating advanced water purification facility in San Diego County.

The \$67 million project will source recycled water from the City's San Luis Rey Water Reclamation Facility. Advanced technology will be used to replicate and accelerate the natural recycling process to provide 3 to 5 million gallons per day, or more than 32% of the City of Oceanside's water supply.

Visit the Pure Water webpage and schedule a behind-the-scenes tour at the San Luis Rey Water Reclamation Facility: www.PureWaterOceanside.org.

SDG&E has developed an energy discount called the **Economic Development Rate (EDR)**. This discount offers eligible businesses a greater opportunity to attract, retain or expand company operations within the California service territory instead of out of state.

With the Economic Development Rate, eligible businesses can receive a 12% discount on monthly bills for a period of 5 years.

For more information visit www.sdge.com/edr.
